700A Current Sensor

For the electronic measurement of currents:
DC, AC, pulsed, mixed with a galvanic Isolation
between the primary circuit (high power) and the
secondary circuit (electronic circuit)

Date: 03.06.2020

Customer: Standard type

Customers Part no:

Description

- Closed loop (compensation) Current Sensor with magnetic probe
- Printed circuit board mounting
- Casing and materials UL-listed

Characteristics

- excellent accuracy
- very low offset current
- very low temperature dependency and offset current drift
- very low hysteresis of offset current
- short response time
- wide frequency bandwidth
- compact design
- reduced offset ripple

Applications

Mainly used for stationary operation in industrial applications:

- AC variable speed drives and servo motor drives
- static converters for DC motor drives
- Battery supplied applications
- Switched Mode Power Supplies (SMPS)
- Power supplies for welding applications
- Uninterruptable Power Supplies (UPS)

Limit curve of measurable current:

AC Current Derating:

Measured without feedback current from sensor (bus pumping effect). For detailed information about the feedback current, which is produced by the sensor due to his final amplifier topology read the application note about interaction between current sensor and power supply.

*Possible way to reduce the Offset ripple by a Low-Pass-Filter

The offset ripple can be reduced by an external low pass. Simplest solution is a passive low pass filter of 1st order with cutoff frequency:

$$f_g = \frac{1}{2 * \pi * R_M * C_a}$$

In this case the response time is enlarged:

$$t'_r \geq t_r + 2,5 * R_M * C_a$$

Other instructions

- Current direction: A positive output current appears at point Is, if primary current flows in direction of the arrow.
- Temperature of the primary conductor should not exceed 105°C.
- The PCBA of this sensor is covered with conformal coating and the sensor is filled with resin.
- Housing and bobbin material UL-listed: Flammability class 94V-0. Resin UL-listed: Flammability class 94V-2.
- Further standards: UL508, UL-file: E317483, category NMTR2 / NMTR8
